DRAFT STRATEGIC PLAN 2017 - 2020
PIDF Vision & Mission

PIDF Vision Statement

A United, Distinctive and Sustainable Pacific Society

PIDF Mission Statement

Enabling Green–Blue Pacific Economies through Inclusive Strategies, Multi-stakeholder Governance, and Genuine Partnerships.
The Three Pillars of the Green Economy:

- Environment
- Society
- Economy
### The Three Pillars

#### Environment
- Pollution
- Climate Change
- Resource depletion
- Biodiversity Loss
- Forest Clearing
- Acidification
- Over-fishing

#### Society
- Poverty
- Disparities
- Gender gaps
- Over population
- Worker exploitation
- Human rights abuses
- Wars over resources
- Increased natural disasters

#### Economy
- Economic Crises
- Market crashes
- Fluctuating prices
- Joblessness
- Powerful Banks
- Weak Unions
- Oil and chemical based industry

---

**CURRENT ECONOMY MODEL**
The Three Pillars

BLUE-GREEN ECONOMY MODEL

Environment
- Non-Polluting
- Renewable Energy
- Biodiversity Gains
- Forest Restoration
- Ocean Restoration

Society
- No poverty
- No disparities
- Gender equity
- Stable populations
- Respect for Human Rights
- Less wars
- Less severe weather events

Economy
- Stable Economy
- Stable Markets
- Stable prices
- Jobs for all
- Smaller banks
- Stronger unions
- Industry based on sustainably managed natural products
Transitioning to Blue-Green Economy

CURRENT ECONOMY MODEL

Environment
- Pollution
- Climate Change
- Resource depletion
- Biodiversity Loss
- Forest Clearing
- Acidification
- Over-fishing

Society
- Poverty
- Disparities
- Gender gaps
- Over population
- Worker exploitation
- Human rights abuses
- Wars over resources
- Increased natural disasters

Economy
- Economic Crises
- Market crashes
- Fluctuating prices
- Joblessness
- Powerful Banks
- Weak Unions
- Oil and chemical based industry

BLUE-GREEN ECONOMY MODEL

Environment
- Non-Polluting
- Renewable Energy
- Biodiversity
- Gains
- Forest Restoration
- Ocean Restoration

Society
- No poverty
- No disparities
- Gender equity
- Stable populations
- Respect for Human Rights
- Less wars
- Less severe weather events

Economy
- Stable Economy
- Stable Markets
- Stable prices
- Jobs for all
- Smaller banks
- Stronger unions
- Industry based on sustainably managed natural products
9 Principles of Green Economy

1. Development Principle: delivers sustainable development
2. Justice Principle: delivers equity
3. Dignity Principle: creates genuine prosperity and wellbeing for all
4. Earth Integrity, Planetary Boundaries & Precautionary Principles: improves the natural world
5. Inclusion Principle: is inclusive and participatory in decision making
6. Governance Principle: is accountable
7. Resilience Principle: builds economic, social and environmental resilience
8. Efficiency Principle: delivers sustainable production and judicious use of resources
9. Intergenerational Principle: invests for the future
10 Priorities

**Priority Area 1: Leadership.**
We acknowledge inclusive and stewardship leadership is a critical requirement for transforming our brown economies into green-blue economies with thriving societies. While political leadership will take the lead, it is essential that leadership in the private sector and civil society (including women, youth and people with disabilities) including religious and traditional, are included and play their roles in the decision making process.

**Priority Area 2: Role of healthy people.**
Healthy and happy Pacific people are the first requirement for sustainable development. A “Whole of Society” approach must be implemented to ensure significant action on the prevention and control of NCDs, promotion of maternal, child and adolescent health and the creation of public-private sector partnership that includes provision of tertiary care services, the use of mobile and internet telecommunication for cheap and readily available online health care, and the use of social media for behaviour change programs and ICT for improved care especially in young people.

**Priority Area 3: Value of the Pacific Common and Collective.**
We prioritize the valuation of critical ecological, social, spiritual/cultural assets that are not being recognized under the “brown economy”; and for the development of appropriate development indicators that reflect and measure progress in these areas of inclusive and sustainable development.
## 10 Priorities

**Priority Area 4: Long term financing / trust funds – support to communities.**
We must implement long term financing mechanisms, including trust funds, that are sourced from public sector budgets, climate change funds, development partners, private sector and other innovative means that support communities on the management of their natural resources and finance critical sustainable development initiatives.

**Priority Area 5: Rigor in implementation of key national and regional commitments.**
We must reform our regulatory, accountability (including monitoring and evaluation) and incentives systems to ensure that green economy initiatives and commitments are effective and sustained at national and regional levels.

**Priority Area 6: Sustainable financial systems.**
We require reforms in our national, regional and global fiscal and financial systems as well as our resource allocation and expenditure (budgetary) processes to direct and redirect resources into ensuring ecological sustainability, social inclusion, and spiritual/cultural wellness.
<table>
<thead>
<tr>
<th>Priority Area 7: Education and capacity building</th>
</tr>
</thead>
<tbody>
<tr>
<td>We must integrate sustainability at all levels, starting with up-skilling teachers and a roll out to primary, secondary and tertiary institutions and curricula. Critical skills areas must be identified and targeted in education strategies to ensure our people’s awareness on sustainability is increased and that they are equipped with the knowledge and the passion to implement a people-centred green/blue economy.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Priority Area 8: Sustainable transport</th>
</tr>
</thead>
<tbody>
<tr>
<td>We prioritize alternatives to existing petroleum driven land and sea transportation that significantly reduce fuel imports. Sustainable shipping approaches are to be promoted and adopted as an alternative to provide effective services for remote island communities.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Priority Area 9: Food security</th>
</tr>
</thead>
<tbody>
<tr>
<td>We ensure food and nutrition security by prioritizing inclusive and sustainable agricultural and fisheries development to meet the needs of our people first, and, by ensuring that trade and significant new investment in resources for management play a supportive role in regards to this objective.</td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>Priority Area 10: Re-Energizing the Pacific</th>
</tr>
</thead>
<tbody>
<tr>
<td>Facilitate the economic transformation of our economies with renewable energy alternatives and significant improvements in energy efficiency through the effective implementation of national energy road maps and other initiatives such as Sustainable Energy 4 All (SE4All).</td>
</tr>
</tbody>
</table>
Relationships in support of PIDF Programme

- International
- National
- PROP
- Private Sector
- Civil Society
- Green Economy (Economical)
- Institutional Arrangement
- Building Resilience (Social)
- Decarbonisation (Environmental)
ONE GOAL

To create and support an enabling environment in PIDF Member Countries for sustainable development that empowers people and safeguards their environment and social fibre and pursues a Green Economy model with full and active participation of their government institutions, civil society and the private sector.
ONE PASIFIKA PROGRAMME

Programme Modalities

- ADVOCACY

Programme Clusters

- M Cluster: Mainstreaming Green Economy
- D Cluster: Decarbonisation by 2030
- R Cluster: Adaptive Solutions for Island Resilience
- I Cluster: Institutional Arrangements
Mainstreaming Green Economy

To establish Green Growth Frameworks in all PIDF member countries and assist them in formulating a plan of action for their implementation.

To ensure that through a Green Audits mechanism, policy contributes positively to sustainable development for the benefit of people and environment.

To support PIDF member countries reform and develop education curricula to reflect the principles of Green Economy and the Sustainable Development Goals for both formal and non-formal education.

To introduce traditional leaders and resource owners to concepts of Green Economy and Sustainable Development and the benefits of multi stakeholder processes to address the needs of their communities.

To establish a Green Business Centre to assist the Private Sector to design and implement strategies to make their businesses environmentally cleaner.

To advocate for and implement ecosystem services mechanisms to ensure the value of these services are truly reflected in national policy and decision making.
Decarbonisation by 2030

To develop a roadmap for climate action that would assist countries with drafting and implementation of decarbonisation plans for this to be achieved by the year 2030, and to assist PICTs in the implementation of their NDCs.

To advocate and keep pressure at the global level to work towards the target of 1.5 °C temperature increase limit compared to pre-industrial levels.

To facilitate the uptake of renewable energy and contribute to reduction of carbon emissions by removing regulatory obstacles in the electricity generation sector of participating PIDF member countries.

To promote sustainable sea transport through advocacy and innovative approaches that would serve the development needs of outlying island communities in an economic and ecological manner.

To promote clean land transport alternatives in our effort to move to a decarbonised Pacific.

To establish a sustainable financing mechanism through the use of green taxation and utilising REDD+ experiences in the Pacific and other regions to enable the restoration of forests in PIDF member countries.
Adaptive Solutions for Island Resilience

To work with island communities and the private sector to improve their resilience to natural disasters and climate change events through the use of traditional knowledge, as well as innovative methods and technologies.

To mobilise leadership, resources and technical knowledge needed to sustainably manage and restore our Ocean resources to safeguard biodiversity and sustainable livelihoods of Pacific people now and in the future.

To encourage policy incentives for healthy lifestyles to address the primary causes of diseases, particularly NCDs and climate change induced vector-borne diseases.

To bridge the gap between development and humanitarian action providing innovative approaches to natural and climate induced disaster response.

To support efforts of women empowerment through interventions with men to provide them with skills to deal with empowered women.

To promote and support sustainable land management particularly to protect soil and water resources.
Adaptive Solutions for Island Resilience

• To assist PIDF member countries in establishing national policy that safeguards the rights of displaced persons, particularly as a result of climate change.

• To promote sustainable tourism that delivers economic development to communities, livelihoods to local producers and environment conservation.

• To work with village communities to introduce the 3Rs concept and render them more environmentally friendly.

• To work with municipal authorities of participating towns and cities to render them environmentally friendly with benefits to their residents through improved health and well-being.

• To work with island communities to transform their islands into Green islands in accordance to principles of Green Economy and Sustainable Development.

• To enhance participatory democracy by linking citizens with public policies, enhancing their comprehension of citizenry and engaging them in political and social debate.
Institutional Arrangements

- To coordinate the establishment and operations of PIDF’s Governance structure
- To establish and operate a Regional Development Trust Fund
- To increase PIDF membership and improve support services for all members
- To establish a network of partners from regional and international organisations active in the Pacific to promote coordination and cooperation.
- To strengthen partnership relationships with national, regional and international entities
- To benchmark PIDF’s operations to international standards (ISO)
- To transform the PIDF HQ into a model Green office
- To create better visibility for PIDF, its Programme and activities
- To develop a 10 year strategic plan for the period 2020 – 2030.

Green Growth Frameworks

PID priorities

M1
Programme Objective:

To establish Green Growth Frameworks in all PIDF member countries and assist them in formulating a plan of action for their implementation.
Possible Activities/Results

- Multi-sectoral consultations held throughout the country to establish priority actions, targets and indicators for measuring success;
- A Green Growth Framework document and an action plan produced;
- A Green Growth implementation process is established.
ADVOCACY

SUPPORTING AN ENABLING POLICY

SUPPORTING NATIONAL, REGIONAL & INTERNATIONAL COMMITMENTS

Programme Modalities

PIDF priorities

Green Audits
To ensure that through a Green Audits mechanism, policy contributes positively to sustainable development for the benefit of people and environment.
Possible Activities/Results

- Green auditors provided to Auditor General offices for a 2-3 year period;
- Green auditing training provided to Auditor General officers, Strategic planning officials, Parliamentarians and parliamentary staff, Finance and Budgeting officials from Government ministries and departments and Tax and Customs authorities;
- Recommendations developed for a Green Auditing process for the major national policy processes;
- Support provided for the implementation of these recommendations.

Capacity Building

PIDF priorities

Green Economy Education

M3
Programme Objective:

To reform and develop education curricula to reflect the principles of Green Economy and the Sustainable Development Goals for both formal and non-formal education.
Possible Activities/Results

- Consultations held with the education authorities to agree on a curriculum intervention in the formal education sector;
- Consultations held with the NGO community to map out a curriculum development process in the informal education sector;
- Support the implementation of the processes agreed for both the formal and non-formal education sectors.
One Pasifika Programme

- Capacity Building

PIDF Priorities

Green Traditional Leadership

M4
Programme Objective:

To introduce traditional leaders and resource owners to concepts of Green Economy and Sustainable Development and the benefits of multi stakeholder processes to address the needs of their communities.
Possible Activities/Results

• Using the informal education curriculum developed through M3 activities, through traditional structures, hold consultations with traditional leaders and resource owners to introduce them to Green Economy and Sustainable Development and help them explore ways to use these principles for the judicial use of their resources.
ONE PASIFIKA PROGRAMME

- Food security
- Re-energizing the Pacific

Pacific Centre for Green Business
To establish a Green Business Centre to assist the Private Sector to design and implement strategies to make their businesses environmentally cleaner.
Possible Activities/Results

- National consultations held with the private sector to establish their needs in transitioning to greener ways of conducting their business;
- Report/s with recommendations produced;
- On the basis of the recommendations, a ‘virtual’ Business Centre is established utilising web tools and social media to assist the private sector in implementing their plans to become green.
Green Business Centre

- Support businesses to be in a position to introduce cleaner technologies and offset their activities while ensuring their profitability.
- Provide incentives, capacity-building, best practices, manuals, on-business tailored support, funding opportunities, web development support for Green business.

PIDF priorities

M6 Eco-System Services
Programme Objective:

To advocate for and implement ecosystem services mechanisms to ensure the value of these services are truly reflected in national policy and decision making.
Possible Activities/Results

- Work through the Ministries of Strategic Planning, with all line ministries officials and Parliamentarians on understanding ecosystem services;
- Work with NGOs and academic institutions on the value of critical ecosystems and common habitat types in the Pacific;
- Work with key decision makers in land use to develop a decision making process that would help them account for ecosystem services.

**Climate Roadmap**

- LEADERSHIP
- MONITORING & EVALUATION OF COMMITMENTS
- SUSTAINABLE TRANSPORT
- RE-ENERGIZING THE PACIFIC
Programme Objective:

To develop a roadmap for climate action that would assist countries with drafting and implementation of decarbonisation plans for this to be achieved by the year 2030, and to assist PICTs in the implementation of their NDCs.
Possible Activities/Results

- Develop a roadmap for climate action that would include:
  - Support member countries in the drafting of decarbonisation plans that would consider the implementation of NDCs (D2), the review of regulations (D3), and the support to Sea (D4), Land (D5) and Air transport.
  - Work with Ministries responsible for planning, energy and transport (and other line ministries), the electricity utilities, academic institutions and the private sector to map out an implementation process for the decarbonisation plans. Support PIDF member countries in their ratification of the Paris Agreement.
  - Consultations held with countries on a review of the NDCs to better align the measures with the commitment targets.
  - Support PIDF member countries through multi-sectoral and multi-stakeholder consultations to focus efforts in the implementation of NDCs. Assess the non-CO₂ GHG contributions of PIDF member countries and recommend measures for their reduction.

1.5 °C Limit
Programme Objective:

To keep pressure on all countries to work towards the target of 1.5 °C temperature increase limit compared to pre-industrial levels and to assist countries in the implementation of their NDCs.
Possible Activities/Results

• Participate in the COP process to keep advocating for ambitious mitigation measures to meet the 1.5 °C limit target;

• Support Pacific efforts in lobbying with all countries to ratify the Paris Agreement and the Doha Amendment of the Kyoto Protocol;

• Support Pacific efforts in international climate related negotiations including within the IMO and ICAO.

Green Taxation for Reforestation
Programme Objective:

To establish a sustainable financing mechanism through the use of green taxation that enables the restoration of forests in PIDF member countries.
Possible Activities/Results

- Work with member countries Ministries of Finance, Forestry and Environment and the Tax Authorities to establish a green taxation regime that would support country’s reforestation efforts;
- Compile all REDD+ experiences in the Pacific and those that may be relevant to the Pacific from around the globe;
- Establish long-term financing mechanisms including through REDD+ systems;
- Establish national reforestation targets based on potential revenue from green taxation and REDD+ incomes;
- Establish community forestry tree nurseries and planting programmes.

PIDF priorities

Resilient Island Communities
To work with island communities to improve their livelihood and their resilience to natural disasters and climate change events through the use of traditional knowledge, as well as innovative methods and technologies.
Possible Activities/Results

• Work with island communities who have suffered from past disaster events to improve their resilience in preparation for future events and provide an alternative to relocation;

• Support the private sector to implement traditional or innovative solutions to issues with energy generation, food security, water management and coastal protection in partnership with Government, NGOs (including Faith-based organisations), Academic institutions, and UN agencies.
Programme Modalities

- **ADVOCACY**
- **SUPPORTING AN ENABLING POLICY**

PIDF priorities

- **Healthy Oceans**
Programme Objective:

To mobilise leadership, resources and technical knowledge needed to sustainably manage and restore our Ocean resources to safeguard biodiversity and sustainable livelihoods of Pacific people now and in the future.
Possible Activities/Results

- Support the implementation of the Framework for a pacific Oceanscape.
- Work with all stakeholders to derive an accurate assessment on the wealth derived from the Pacific Ocean (including in the form of ecosystem services) and the status of our Ocean’s health.
- Explore the establishment of a PNA-like agreement for the Pacific Beche-de-mer industry.
- Develop a strategy for the protection of the Pacific ocean with possibly a regulatory framework for its sustainable management.
- Support the national and regional preparations for the high level U.N. Conference on Oceans and Seas to be held in Fiji in June 2017.
2017 Pacific Year for the Ocean

- Pacific Leaders declared the PYO at the PIDF Leaders’ Summit in Honiara last July.
- Governments and organisations invited to make commitments for PYO.
To encourage policy incentives for healthy lifestyles to address the primary causes of diseases, particularly NCDs and vector-borne diseases.
Possible Activities/Results

- Work with all stakeholders to address causes of NCDs particularly in relation to over consumption of sugar and salt by providing economic incentives for healthier choices;
- Promote responsible sponsorship and advertising;
- Address issues related to the threats posed by increases in vector-borne diseases as a result of climate change with potential increase in incidence of malaria, dengue, chikungunya and zika around the Pacific.

Sustainable Land Management

R6

PIDF priorities

ONE PASIFIKRA PROGRAMME

Pacific Islands Development Forum
Programme Objective:

To promote and support sustainable management of land particularly to protect soil and water resources.
Possible Activities/Results

- Together with academic partners and other agro-science organisations assess the state of the soils of Pacific islands countries and draw recommendations for their sustainable management;
- Build local capacity in the sustainable use of land, permaculture, forest farming, organic farming, regulated and controlled use of pesticides and artificial fertilisers;
- Build local capacity in water-shed management.

Trust Fund
Programme Objective:
To establish and operate a Regional Development Trust Fund.
Activities/Results

- Consultants appointed for the establishment of the Trust Fund;
- Implementation of recommendations arising from the consultancy;
- Establish a grant management system;
- Promotion of the Trust Fund among member states, donor countries and the private sector.
Programme Objective:

To increase PIDF membership and improve support services for all members.
Activities/Results

- Promote PIDF’s vision, mission and programme in all member and eligible member countries and organisations
- Conduct outreach activities to eligible countries to discuss membership opportunities
- Explore opportunities for members’ representation within the PIDF secretariat
- Develop research and information strategies including policy research and monitoring and evaluation.
- Pursue increased member support from PIDF members (membership donations)

To create better visibility for PIDF, its programme and activities.
Activities/Results

Visibility

- Develop and implement a communication strategy;
- Establish media partnership to further promote PIDF’s work;
- Utilise communication tools (newsletters, website, social media) to promote PIDF’s work;
- Develop efficient library services for PIDF and its members.
One Pasifika Programme

Programme Modalities

- Advocacy
- Supporting an enabling policy
- Supporting national, regional & international commitments
- Capacity building

Strategic Plan

PIDF priorities

1. Recognition of role of healthy people
2. Value of the common & collective
3. Long term financing
4. Monitoring & evaluation of commitments
5. Sustainable financial systems
6. Education & capacity
7. Sustainable transport
8. Food security
9. Re-energizing the Pacific
Programme Objective:
To develop a 10-year strategic plan for the period 2020-2030.
Activities/Results

• Hold multi-sectoral consultative meetings in all member countries.
Group Exercise

Consider the 4 clusters of action presented in the Strategic plan.

Considering PIDF’s role and the role of other organisations, what activities should PIDF be engaged in under these 4 clusters?

How can PIDF implement these in your country?
